

Dedicated BIO4SELF workshop during International Conference on Composites (Belgium)

- The conference with a focus on “**Advances in Composite Structures and Materials**” will be held on **October 2 & 3, 2018** in Liège (Belgium). It will bring together industry innovators, technology providers, researchers, economic promoters and other actors of the Composite Industry from all across Europe.
- On October 2, a **workshop** dedicated to the **BIO4SELF results** will be organised in parallel. All conference participants will be invited to attend (free of charge).
- The BIO4SELF workshop will cover the different steps to obtain self-reinforced PLA composites, going from the production of reinforcing filaments and intermediates to the consolidation into a final composite product. These results will be presented by the project partners involved.
- More information and how to register for this interesting conference can be found on the website: <https://www.centexbel.be/en/agenda/international-conference-composites>.
